Fundamentals of Investment Management with S&P bind-in card
Geoff Hirt 2007-09-17 Fundamentals of Investment Management is the only textbook in its class, covering all aspects of investment management, while at the same time applying this theory to real-world examples. Students will be able to translate what they have learned in the course to actual participation in the financial markets. The textbook provides students with a survey of the important areas of investments: valuation, the marketplace, fixed income instruments and markets, equity instruments and markets, derivative instruments, and a cross-section of special topic areas. The book includes a comprehensive set of problems. The book is used at many Wall Street firms. Geoff Hirt directed the CPA program for the Investment Analyst Society of Chicago and is a partner at the Chicago Institute of 15 years and on the board of directors from 2002 to 2007. His CPA has been a practicing CPA for over 20 years. Both professors have taught and advised student managed investment funds at their universities and longer this wealth of learning experiences to the students who study from this textbook. The authors are able to make this book to the importance of covering the latest and most important material for the student of investments.

Increase your knowledge of this market and enhance your financial performance over the long-term with Fixed Income Securities, Second Edition. www.wileyfinance.com

**Analysis of Derivatives for the CFA Program**
Don M. Chance 2003

Analysis of Derivatives for the CFA Program introduces students and practitioners to a practical risk management approach to derivatives. The textbook captures current practice and reflects what the general investment practitioner needs to know about derivatives. It does not simply deliver an explanation of various derivatives instruments and positions but provides motivation for every derivatives position by explaining what the manager wants to accomplish prior to addressing the details of the position.
